

The DOLPHIN is constructed of maintenance-free materials. However, its life may be extended by following the advice below:

- Avoid leaving the trailer in direct sunlight for long periods.
- The hood must be dry before packing the trailer up for long periods.
- Prevent dirt getting into important connections (wheels, tow bar, coupling etc.)
- Wash the hood and plastic hull with soap and water and a soft brush or sponge while mounted on the trailer. Hand wash at max. 30°. **Important:** Must be mounted immediately after wash to avoid crumpling of the windows.
- The cushions can be hand-washed at 40°.
- Tyre pressure should be 35-45 PSI.
- Fix loose Velcro with ordinary contact adhesive. Wash the surface with spirits.

UK Warranty

A. Winther A/S offers warranty on its DOLPHIN child trailers on the following terms:

- Warranty on frame and components for two years from date of purchase, except for wear to tyres and inner tubes.
- The warranty is restricted to the repair or in certain cases replacement of components, and excludes transport and labour. Compensation for consequential damage will not be paid.
- The warranty is restricted to the original purchaser. All claims must be accompanied by proof of purchase.
- The DOLPHIN may only be used as a cycle trailer, push-buggy or jogging carriage. Use in conjunction with mopeds, motorcycles and other vehicles is not advised.
- The DOLPHIN must only be attached to a cycle by its original Winther-coupling, a WEBER coupling or another officially approved coupling.
- Any disputes shall be settled in the Danish courts according to the Law of Denmark.
